# Eleonora Calò

Lighting and graphic designer presso Status s.r.l.  
Novara, Piemonte, Italia

## Riepilogo

I'm a lighting designer, passionate for light and design in general. Through my training, first addressed to product design and then to lighting, I discovered the world of lighting design. What intrigues me most about this sector, is the way the light can change our lives. A good lighting project can change the perception of spaces, it can excite, it can help to improve human performances.

Today men spends hours of their day taking advantage of artificial light, and for this reason the light must be designed according to man.

I am organized, creative and always looking for new challenges.
